

# Buy an ECM 830 System Get a free BTXpress Solution

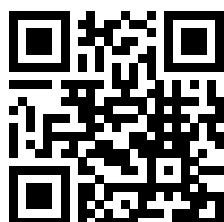

BTXpress High Performance  
Electroporation Solution

## Versatile Mammalian Transfection

- **Deliver any payload** including DNA, RNA, proteins, drugs, CRISPR RNPs and nanoparticles
- **Suitable for a variety of applications** in vitro, in vivo and high-throughput transfection

## Single Buffer Solution

- **High transfection efficiency** for hard-to transfect cell lines and primary cells
- **Greater cell viability** than when electroporated in media or buffered salt solutions

**PROMOTIONAL CODE: BTX20**  
**OFFER EXPIRES: DECEMBER 10, 2020**

Please see next page for additional details.

Our local sales representatives and technical applications scientists are available to help you select the best electroporation system for your application. Offer applies to BTX ECM 830 systems and 5.0 ml size of BTXpress High Performance Electroporation Solution listed in this promotion. Promotion BTX20 must be indicated at the time of order. Exclusions may apply. Please contact Technical Services or your local BTX Representative for restrictions.

#### ECM 830 Systems

Order #	Description
45-2052	ECM 830 Electroporation System, with Safety Dome
45-0661	ECM 830 Electroporation System, with Safety Stand
45-0662	ECM 830 Generator Only
45-0664	ECM 830 High Throughput Electroporation System, 25-well with HT-200
45-0666	ECM 830 High Throughput Electroporation System, 96-well with HT-200
45-0667	ECM 830 Electroporation System, with Monitoring
45-0669	ECM 830 Bipolar Electroporation System, with Pulse Switcher

#### BTXpress High Performance Electroporation Solution

Order #	Description
45-0802	BTXpress Solution, 5.0 ml Bottle for up to 50 reactions
